

vided that: “The Secretary of Transportation shall develop a selection process for discretionary bridges authorized to be funded under section 144(g) [now 144(f)] of title 23, United States Code, and shall propose and issue a final regulation no later than six months after the date of enactment of this Act [Jan. 6, 1983], including a formula resulting in a rating factor based on the following criteria for such process. Such criteria shall give funding priority to those discretionary bridges already eligible under section 144(g) of title 23, United States Code, including a bridge replacement of which was partially funded under the Supplemental Appropriations Act, 1983 [Pub. L. 98-63] (97 Stat. 341). Eligible bridges after the issuance of a final regulation shall only include those with a rating factor of one hundred or less, based on a scale of zero to infinity. The criteria for such additional bridges which the Secretary shall consider are:

“(1) sufficiency rating computed as illustrated in appendix A of the Recording and Coding Guide for the Structure Inventory and Appraisal of the Nation’s Bridges, USDOT/FHWA (latest edition);

“(2) average daily traffic using the most current value from the national bridge inventory data;

“(3) average daily truck traffic;

“(4) defense highway system status;

“(5) the State’s unobligated balance of funds received under section 144 of title 23, United States Code, and the total funds received under section 144 of title 23, United States Code;

“(6) total project cost; and

“(7) special consideration should be given to bridges closed to all traffic or restricted to loads less than ten tons. Other unique considerations and the need to administer the program from a balanced national perspective should also be considered.”
